PUBLISHER'S NOTICE.

THIS WORK was commenced in November, 1864, the computation of the author than being that it could be comprised in one thousand four hundred pages, and would eccupy two years. Many unlooked for obstructions, chiefly of a typographical define, materially retarded the progress of the work in the first instance, and these being overcome, the author discovered that he had underestimated the extent and the importance of the vast task he had undertaken, and that it would occupy fully double the time and space which he had at the outset computed.

The publication of a work of such magnitude, and presenting so many and such varied obstacles, seldom falls to the limited resources of one single individual, as occurs in this case. The first part seldom falls to the limited resources of one single individual, as occurs in this case. The first part of the work is now issued, partly at the request of the author and partly to afford the Poreign Community of China an opportunity of extending that assistance to the publisher, which under the circumstances is usually so freely accorded.

The price of the book complete, will be \$30, and it will be published in four parts at \$7.50 each. But this objection presents itself to the sale of the parts separately, should the purchaser of one or more parts not take the others, a number of incomplete, and consequently valueless, copies will be left on the publisher's hands. To remedy this objection, in consideration of the circumstances alroady alluded to, it is hoped that those who see it to patronise the undertaking by purchasing the first part, will not object to signing an engagement to take the remaining parts as they appear, or should they prefer it, to pay for the entire work in advance. tire work in advance.
